LETTER OF RECOMMENDATION

To whom it may concern

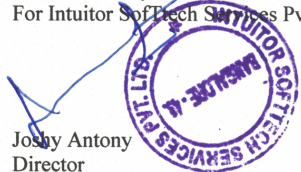

It brings me great joy to recommend Namrata Rao for the master's program at your esteemed university. She has worked as a part of the NOC team under my supervision at Intuitior Softech Services Pvt Ltd.

She was initially recruited as NOC intern and trained in various areas with respect to the industrial standards. The most prominent trait that comes to mind is her engagement to the task; she is highly alert and respects deadlines. When the opportunity arose, her dedication towards learning combined with excellent communication convinced me to hire her as L1 Network Engineer.

Namrata brings in enthusiasm and creativity to the workplace and maintains a good rapport with her colleagues. She is a team player and shows positive attitude towards new challenges. During her tenure with us, she acquired a deep understanding on networking concepts and went on to secure CCNA certification which will lay a strong foundation in pursuit of her graduate studies.

She has proven her capability to work across internal and overseas clientele and her elaborate skillset has contributed to the smooth functioning of the projects. I am confident that Namrata will emerge to be one of the exceptional students, she is hard working, well trained and ambitious hence I strongly recommend her to the master's program at your university.

Yours faithfully,
For Intuitior SofTech Services Pvt Ltd
